

## Environmental Policy

Beyond Green is a leading sustainability advisory practice that is committed to the delivery of impartial advice and high quality services to its clients throughout Scotland and the United Kingdom.

Although Beyond Green does not have a certified ISO14001 environmental management system given its size and significance of its impacts, it does record, manage and report its carbon impacts on an annual basis. We aim to lead by example to effectively manage our key environmental impacts at our head office. The key impacts of our activities are travel and energy consumption.

### Our specific commitments are:

- Comply with environmental legislation and other relevant requirements.
- Seek to influence our clients and partners to reduce the environmental impacts of their activities.
- Take actions to prevent pollution to land, water and air.
- Consistently seek to increase the awareness to all stakeholders of the sustainability challenges and opportunities.
- Reduce the environmental impact of our office supplies, equipment and marketing material.
- Adopt the carbon management hierarchy for our travel programme
  - Use travel alternatives where possible
  - Reduce car use by travelling by public transport
  - Take the plane as option of last resort
- Continually review and improve the environmental management of our activities

### Objectives for 2017

- Communicate our performance from sustainable business practices
- Encourage Active Travel to work and to clients where possible
- Continually develop our active travel monitoring and implement an incentivise an active travel programme
- Improve the recording and reporting of our energy consumption
- Sustainable procurement through the use of local suppliers, Cloud based solutions, recycled materials and refurbished equipment
- Obtain accreditation to ISO14001:2015

### Communication

This policy is published on the company website and is available at office.

Signed:

PAUL ADDERLEY, Managing Director.
